Profile Summary

Aspiring Software Engineer with a solid understanding of programming languages, data structures, and software development principles. Passionate about developing efficient applications and solving real-world problems. Seeking an opportunity to contribute to a dynamic team while enhancing technical and professional skills.

Education

PSG College of Arts & Science, Coimbatore

B.Sc. in Computer Science CGPA: 7.5/10

2023 – 2026

Islamiah Matric Higher Secondary School, Coimbatore

HSC (Class 12) | Percentage: 84%

2022 – 2023

SSLC (Class 10) | Percentage: 100%

2020 – 2021

Skills

Programming: Python, Java

Core Concepts: Data Structure & Algorithm (Basics), OOP Concept (Basic)

Web Basics: HTML, CSS

Tools & Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, OpenCV

Databases: MySQL, SQLite

Academic Projects

Spam Message Classifier (NLP)

- Built a text classification model using TF-IDF and Logistic Regression.
- Achieved 70% accuracy on validation dataset.
- Applied preprocessing techniques like tokenization and stopwords removal.

Lung Detector AI – Intelligent Histopathology Analysis System

- Developed a deep learning model using CNN to classify lung cancer subtypes from medical images.
- Improved model interpretability using Grad-CAM visualization technique.
- Deployed the model as a Flask web application for real-time predictions.

AI Agri Quality Inspection System – AI-Based Fruit Grading and Quality Analysis

- Built an image classification system to automate fruit quality grading.
- Processed large-scale image datasets to detect defects and classify quality.
- Improved efficiency by reducing manual inspection using AI-based analysis.

Research & Experimentation

- Conducted experiments on multiple ML models (Logistic Regression, CNNs) to analyze performance trade-offs.
- Explored model optimization techniques including hyperparameter tuning and feature selection.
- Applied evaluation metrics such as precision, recall, F1-score for performance comparison.
- Studied research papers related to NLP and Computer Vision to improve model design.

Training Experience

Career Ladder, Full Stack Web Development Intern

May – Jun 2025

- Developed responsive web pages using HTML, CSS, JavaScript
- Built backend APIs using Node.js and Express.js
- Integrated MongoDB and MySQL for data handling

Certified Courses

Web Designing Course – PSG College of Arts & Science

April 2024

Web design principles and interface development techniques.

Cyber Security – Coursera

June 2025

Fundamentals of Cyber Security concepts and best practices.

Soft Skills

- Communication
- Team Collaboration
- Time Management
